

Project Title	#STEM 2020
Project Summary	Seeking energetic and driven intern(s) to design and develop creative content such as social media/web materials, posters/materials, videos, writing blogs/articles to promote the St. Louis U.S. Army Corps of Engineers' Award Winning STEM program.
Country	United States

Project Description

As America's lead engineering organization, it's the Corps of Engineers responsibility to promote Science, Technology, Engineering, and Math related curriculum and careers. The St. Louis District K-12 Award Winning Outreach Program serves as a model outreach program for the U.S. Army Corps of Engineers. The St. Louis District K-12 Outreach Program ties the missions of the St. Louis District and our partners with the needs of our local students.

As part of our team you will have an opportunity to develop social media content, write blogs, design posters/brochures and edit and produce fun and engaging graphics and videos. Additional assignments may include conducting interviews with staff and partners to write articles and stories to increase the program's visibility and developing campaign materials (infographics, fact sheets).
